No. 176—Notification.—In exercise of the powers conferred on him by sections XI and XII of Act V (B.C.) of 1864 (The Canals Act), the Lieutenant-Governor of Bengal proposes to pass the following rules in regard to the line of channel connecting the Kurnafuli and the Chandkhali rivers, known in its various parts as Sikalbaha and Murali khals, in the district of Chittagong.

A. D. McARTHUR, Colonel, R.E.,
Secy. to the Govt. of Bengal.

1. Every vessel on entering the above channel shall be liable to measurement by the officer in charge of the toll station for the purpose of ascertaining the amount of toll to be paid.

2. The tonnage of every vessel, whether laden or empty, shall, for the purposes of the *Canals Act* and of these rules, be determined by the following measurements:—

(a) The product of half the length of the vessel from stem to stern measured along the water line, multiplied by the interior greatest breadth of the vessel, multiplied by the depth from the water line to the bottom of the vessel, is to be taken as the number of maunds upon which toll shall be levied.

(b) The measurement of the length is to be made in feet, rejecting inches. The measurement of the breadth and depth is to be made in feet and quarters of a foot, rejecting portions of less than a quarter of a foot.

(c) In calculating the amount of toll to be levied, any fraction of 100 maunds less than 50 maunds is to be omitted; and a fraction exceeding 50 maunds is to be charged as 50 maunds only.

3. No raft will be admitted into the channel in excess of 50 feet in length or 5 feet in breadth. No timber, bamboos or grass will be admitted except securely and compactly packed in the form of a raft.

4. Every vessel entering the channel shall be furnished with a ticket on paying the prescribed toll. The ticket will specify the date of entry, the maundage of the vessel and the amount of toll paid.

5. No vessels whatever except such as are employed on works connected with the maintenance or improvement of the channel shall be exempted from paying toll.

6. Every vessel or raft which has paid toll shall be allowed three days to pass through the channel, the days of entering and leaving being both included, and any vessel or raft remaining in any part of the channel longer than the period above fixed shall, for each day in excess of such period, be charged demurrage equal to one-half of the toll paid. Every vessel or raft remaining in the channel more than one month without authority from the Supervisor shall be subject to be summarily removed.

7. Any person infringing any of the above rules, or wilfully interfering in their enforcement, shall be liable, under section XI of the Canals Act, to a fine not exceeding fifty rupees for any one offence.

A Dictionary of the Economic Products of India

By DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

The first five volumes and Vol. VI, Parts I, II, III & IV of the Dictionary are ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is Rs. 45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, Rs. 2-6 per volume. For copies bound in half calf or half morocco, Rs. 6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names; habitat or source; history; properties and uses (both chemical and industrial); trade statistics; markets, &c. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross-references, so that little difficulty need be experienced in finding the account of a product, even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal 8vo. pages; Vol. II embraces the letter C in 689 pages; Vol. III contains the letters D, E, F and half of G; Vol. IV latter half of G to middle of L; and Vol. V contains the latter half of L to end of O; Vol. VI (which consist of four parts), Part I, contains letters P to R. The whole work completed in nine volumes (including Parts II to IV of Vol. VI); but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a Glossary of the Vernacular and European names of the plants, animals and minerals of India, and, as such, will be a work of reference, which, it is hoped, may prove of considerable value.

STATEMENT OF THE COURSE OF BUSINESS.

The Hon'ble THE PRESIDENT said:—"Gentlemen—I have to thank you for your presence here this morning. Since the Council last met, there have been changes in its composition, and more are imminent. We have lost the services of Mr. A. M. Bose, who represented the Calcutta University, and Babu Eshan Chandra Mittra, representing the Municipalities of the Burdwan Division; while on Monday next, Babu Guru Proshad Sen, representing the District Boards of the Dacca Division, will vacate his seat. To each and all of these gentlemen I offer, on behalf of the Province which they have served, the acknowledgment of Government for the valuable assistance which they have given during their terms of office. The Hon'ble Babu Surendranath Banerjee left us only to return speedily, and I may take this opportunity of saying that the Hon'ble the Maharaja of Darbhanga has been so good as to place his valuable services once more at the disposal of the Province. My gratitude to these gentlemen, therefore, partakes of the nature of a lively sense of favours to come. We have to welcome new colleagues in the place of those who are now leaving us. I hope they will permit me to say that their past histories and reputation afford us a guarantee that they will prove themselves most useful Members of this Council. They will find that the work which they have undertaken will make considerable demands on their time and attention. Their labours are not to be measured by the time spent in meetings in this Chamber. Attendance on Select Committees, and the persual and examination of papers connected with projects of law, are not the less laborious because they are not conspicuous in the sight of the public.

"Your labours this Session will not, I think, be severe, though they will be of some importance. The Partition Bill has received further criticisms, and these will be laid before the Select Committee. The points are for the most part matters of detail, and are not likely to detain the Select Committee long. It is hoped that the Bill will be passed in the course of this Session. The Select Committee will also proceed with the Chota Nagpur Tenancy Bill; this Bill, as has been explained fully by the Hon'ble Member in charge, is of a local character, and is intended to meet local wants. You will probably be greatly guided by the opinions of those who are familiar with the local conditions. It is not improbable that we shall be able to pass this Bill also. I shall not ask you to consider at present the Bengal Tenancy Bill. Some criticisms on it have been received, and Government will be glad to receive any further expressions of opinion on its provisions, with which they may be favoured; so that on Sir Alexander Mackenzie's return, his Government may be in a position to consider it in the full light of public opinion."

WORKING OF THE FIRE BRIGADE IN THE TOWN AND SUBURBS OF
CALCUTTA AND IN THE MUNICIPALITY OF HOWRAH FOR THE
YEAR 1896-97.

No. 7034, dated Calcutta, the 21st July 1897.

From—A. H. JAMES, Esq., Commissioner of Police, Calcutta,

To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to submit, under section 30 of Act IV of 1883, a report on the working of the Fire Brigade in the Town and Suburbs of Calcutta and in Howrah during 1896-97.

2. During the year 60 fires occurred, in each of which the value of the property destroyed exceeded Rs. 50 in value.

At 45 of these the Brigade were in attendance, and 15 were extinguished by the out-station manual engines and the residents of the locality.

3. In addition to the 60 serious fires already noted, 161 other petty fires occurred,—54 in the Town of Calcutta, 98 in the Suburbs and 9 in Howrah. The Brigade attended 24 of these fires; the remaining 137 were extinguished by the out-station manual engines and residents of the localities.

The average value of property destroyed at these fires was Rs. 6.

The estimated value of property destroyed during the year amounted to Rs. 1,13,505 as against Rs. 6,93,647 in 1895-96.

4. There was loss of life at two fires only during the year, viz.—

In a fire at No. 51, Free School Street, a child, aged five years, was suffocated, and at a fire at Sahib Bagan, Sibpur, a blind girl, aged seven years, was burnt to death.

5. There were seven fires in buildings licensed under Act I (B.C.) of 1893 and Act I (B.C.) of 1894. Property to the value of Rs. 25,532 was destroyed.

6. Of the above fires that occurred during the year, four call for special notice—

I. On the 15th April, at 51, Free School Street, a large stock of lace was burnt, and a child as abovementioned was suffocated.

II. At Chitla, on the 15th April, 166 tiled and goleputta huts and 3 large wood depôts were destroyed. This fire burnt furiously for three hours.

III. Again at Chitla, on the 20th April, on ground adjoining that of the fire of the 15th, 55 tiled and goleputta huts and 3 large corrugated iron sheds were burnt to the ground, but without loss of life. The fire lasted two and-a-half hours.

IV. At Subjee Bagan, Chitla, on the 27th February 1897, a large corrugated iron shed and a quantity of rice insured for Rs. 28,600 were destroyed. This fire burnt and smouldered for nineteen hours.

7. During the year one prosecution was instituted under the Explosives Act. The defendant was acquitted.

8. A memorandum of the fires that occurred and a statement showing receipts and expenditure on behalf of the Brigade are enclosed.

Imports.—During the week under report, the imports of rice amounted to 148,979 cwts., against 72,452 cwts. in the corresponding week of 1896. The amount imported from Burma amounted to 132,521 cwts., against nil in the corresponding period of last year; while Chandbali sent only 9,883 cwts. against 70,007 cwts., but the imports from Balasore showed a slight increase of 1,958 cwts. The imports of 677 cwts. of rice from foreign ports came from the Straits Settlements, which sent nothing in the corresponding period of last year. Supplies of paddy fell off from 36,046 cwts. to 4,482 cwts., owing chiefly to small imports from Chandbali. Gram and pulses were imported from Madras and the Straits Settlements.

Exports.—In the following statement the total quantity of each kind of food-grain exported by sea during the week ending 21st July 1897 is compared with the figures for the corresponding period of 1896:—

The exports of rice from Calcutta to foreign ports were 59,165 cwts. in the third week of July 1896, and only 31,102 cwts. in the period under report. The chief fluctuation occurred in the exports to Ceylon, only 315 cwts. against 28,963 cwts. in the corresponding week of last year. The falling off under gram and pulses was due to smaller quantities being sent to the United Kingdom, while in the case of miscellaneous food-grains, Mauritius is credited with only 2,047 cwts. against 5,132 cwts. in the week ending the 21st July 1896.

As regards Indian ports, the exports of rice to Bombay during the week ending 21st July 1896 amounted to 6,085 cwts., while in the week under report nothing was sent to that port. A large supply of wheat, aggregating 7,700 cwts., was despatched to Rangoon against 1,687 cwts. in the corresponding period of last year. The falling off under gram and pulses occurred chiefly in the exports to Bombay, to ports in Madras and to Narrakal in Cochin.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beekley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

No. 146 Marine.—The following communication, dated the 26th June 1897, from Sir Francis Clare Ford, with its enclosure, relative to the Italian Maritime Sanitary Ordinance No. 5 issued with a view to prevent delays to vessels arriving in Italian ports from infected districts in India, is published for general information.

A. D. McARTHUR, Col., R.E.,
Secy. to the Govt. of Bengal.

No. 42C., dated Foreign Office, the 1st July 1897.

From—GEORGE CURZON, Esq.,

To—The Under-Secretary of State, India Office.

I AM directed by the Secretary of State for Foreign Affairs to transmit to you, to be laid before the Secretary of State for India, the accompanying copy of a despatch as marked in the margin enclosing the Italian Maritime Sanitary Ordinance No. 5, intended to obviate delays to vessels arriving in Italy from India.

No. 42C., dated Rome, the 26th June 1897.

From—FRANCIS CLARE FORD, Esq.,

To—The Marquess of Salisbury, K.G., &c., &c., &c.

I HAVE the honour to transmit herewith to Your Lordship a copy in triplicate, together with a translation of the Sanitary Maritime Ordinance marked No. 5, and dated the 20th instant, which I have received from the Department for Foreign Affairs.

The present Ordinance has been made with a view to preventing, as far as possible, delays to vessels arriving in Italian ports from infected districts in India.

It will now be possible for the owners and Captains of vessels to enlist the services, should they desire it, of Italian medical officers who would accompany the vessels from Port Said to the Italian ports to which they may be bound, and thus the delay to those vessels arriving there would be almost nominal.

(TRANSLATION.)

Ministry of the Interior.

1897.—Sanitary Maritime Ordinance No. 5.—For the purpose of affording shipping and trade all the facilities consistent with the requirements of the Sanitary Service and particularly for the purpose of avoiding delays in granting free pratique to steamers which, though free from disease, have to undergo medical inspection and disinfection for the sole reason of their coming from a place infected by plague.

Seen the Law of 22nd December 1888, No. 5849 (3rd series), for the protection of hygiene and public health.

The Minister of the Interior decrees:—In cases when the owners or masters of steamers coming from Indian ports specified in the Maritime Sanitary Ordinance of the 1st of May last, and bound for Italy, make a formal application to that effect, a doctor, to be appointed in each case by this Ministry, can be embarked on such steamers at Port Said.

Section 2.—The said doctor will be entrusted with the general sanitary surveillance on board the ship during the crossing from Port Said to the Italian ports of destination, and within 24 hours preceding the arrival of the steamer in an Italian port, he is to ascertain that the disinfection of the soiled articles of wearing or domestic apparel has been carried out, and will proceed to a medical examination of all persons on board.

Section 3.—It will besides be the doctor's duty to lodge, with the Harbour authorities on arrival of the steamer, a written declaration showing the hygiene and sanitary conditions on board, and suggesting the treatment to be adopted. Should everything prove to be in good order, the steamer will, as far as the sanitary formalities are concerned, be admitted

to free pratique. Should, however, any abnormal circumstance have been detected, the steamer will in that case have to undergo all those measures which are in respect of the various cases set forth in the Sanitary Maritime Ordinances now in force.

Section 4.—The above-mentioned doctor will be entitled to passage and first-class fare on board, free of charge, and his fee, which in each case shall be fixed with the approval of this Ministry, will be defrayed by the Masters of the Steamers.

Section 5.—The dispositions of Sanitary Maritime Ordinance of 8th May last, No. 3, remain unchanged in their substance, as the present Ordinance is meant only to modify the formalities regarding the carrying out of the medical inspection and of the disinfections of such steamers as were constantly in a normal condition from the time of their departure to that of arrival.

The Prefects of the Maritime Provinces and the Harbour authorities of the Kingdom are charged with the execution of the present Ordinance.

For the Minister,

BERTARELLI.

Imports.—During the period under report, the imports of rice amounted to 201,799 cwts., against 20,810 cwts. in the last 10 days of July 1896. The amount coming from Burma was 175,130 cwts., against nil in the corresponding period of last year. Chand-bali sent only 9,312 cwts., against 17,926 cwts. in the last 10 days of July 1896, while the imports from Balasore showed a slight increase of 3,753 cwts. The imports from the Straits Settlements amounted to 5,809 cwts., against nil in the corresponding period of last year. Supplies of paddy rose from 6,731 cwts. to 16,833 cwts., owing chiefly to large imports from Burma. Gram and pulses were imported from Madras, Burma, and the Straits Settlements.

Exports.—In the following statement the total quantity of each kind of food-grain exported by sea during the last 10 days of July 1897 is compared with the figures for the corresponding period of 1896 :—

Total ...	1,71,099	2,32,885	35,529	43,359

The exports of rice from Calcutta to foreign ports declined from 116,556 cwts. in the last 10 days of July 1896 to 12,615 cwts. in the period under report. The decline was chiefly due to the absence in 1897 of shipments to Réunion, Natal, Cape Colony and Mauritius, to which ports 47,262 cwts., 18,853 cwts., 6,279 cwts., and 3,865 cwts. respectively were exported in the 10 days ending 31st July 1896. The despatches to Ceylon fell from 27,687 cwts. to only 1,180 cwts., while those to the United Kingdom increased by 3,497 cwts. The decrease under gram and pulses and miscellaneous food-grains was chiefly due to the cessation of exports to Mauritius and Natal.

As regards Indian ports, the exports of rice to Bombay during the 10 days ending 31st July 1896 amounted to 13,439 cwts., and in the period under report to only 1,005 cwts. Under gram and pulses, Bombay received nothing as against 2,738 cwts. in the corresponding period of last year, while the decline in the exports to the Madras ports amounted to 6,762 cwts.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below :—

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore .003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 0.6° higher; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0.6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beekley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers.

No. 1669.—The following letter from Her Majesty the Queen, Empress of India, published in the Supplement to the *London Gazette*, dated the 16th July 1897, is republished for general information:—

Whitehall, July 16th, 1897.

The following letter from The Queen has been received by the Right Honourable the Secretary of State for the Home Department:—

Windsor Castle, July 15th, 1897.

I have frequently expressed my personal feelings to my people, and though on this memorable occasion there have been many official expressions of my deep sense of the unbounded loyalty evinced, I cannot rest satisfied without personally giving utterance to these sentiments.

It is difficult for me on this occasion to say how truly touched and grateful I am for the spontaneous and universal outburst of loyal attachment and real affection which I have experienced on the completion of the Sixtieth year of my Reign.

During my progress through London on the 22nd of June, this great enthusiasm was shown in the most striking manner, and can never be effaced from my heart.

It is indeed deeply gratifying, after so many years of labour and anxiety for the good of my beloved Country, to find that my exertions have been appreciated throughout my vast Empire.

In weal and woe I have ever had the true sympathy of all my people which has been warmly reciprocated by myself.

It has given me unbounded pleasure to see so many of my subjects from all parts of the World assembled here, and to find them joining in the acclamations of loyal devotion to myself, and I would wish to thank them all from the depth of my grateful heart.

I shall ever pray God to bless them and to enable me still to discharge my duties for their welfare as long as life lasts.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 7th August 1896, and the corresponding period of 1897, is shown in the following statement:—

Imports.—The different staples comprising the import traffic are shown in the table below and the figures for the period are compared with those for the corresponding period of last year:—

Total	...	3,025	4,117	274,950	3,74,237

Imports.—During the period under report, the imports of rice amounted to 249,693 cwts., against 1,834 cwts. in the first week of August 1896. The amount that came from Burma was 242,085 cwts., and from Madras 6,219 cwts. against nil in the corresponding period of last year. The total imports of paddy rose from 1,191 cwts. to 14,090 cwts., owing chiefly to large quantities coming from Burma and Coconada. Gram and pulses were imported from Madras, Burma, and the Straits Settlements, during the week ending 7th August 1897, while in the corresponding period of last year no such imports took place.

Exports.—In the following statement the total quantity of each kind of food-grain exported by sea during the week ending 7th August 1897 is compared with that for the corresponding period of 1896 :—

	1ST TO 7TH AUGUST

Total ...	1,07,646	1,46,518	13,242	18,024

The exports of rice from Calcutta to foreign ports declined from 64,877 cwts. in the 1st week of August 1896 to 1,341 cwts. in the period under report. The decline was chiefly due to the absence in 1897 of shipments to the United Kingdom, Demerara, Trinidad and Muscat, to which ports 40,823 cwts. were exported in the week ending 7th August 1896. The despatches to Ceylon fell from 22,760 cwts. to only 485 cwts. The decrease under gram and pulses was chiefly due to smaller exports to the United Kingdom and Ceylon.

As regards Indian ports, the exports of rice to Bombay during the first week of August 1896 amounted to 5,826 cwts., against nil in the period under report. Under gram and pulses, Bombay received nothing as against 11,506 cwts. in the corresponding period of last year, and the decrease in the exports to the Madras ports amounted to 2,600 cwts.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

General Summary.—There was general rain during the week, but the fall was slight in parts of North Bengal and North Bihar and in the Palamau district of Chota Nagpur. In these districts, however, some rain is reported to have fallen after the close of the week and prospects have improved, but much more is still required, especially in Palamau and Champaran and the Madhubani subdivision of Darbhanga, for the transplantation of winter rice. The prospects of *bhadi* crops are generally good except in Patna, where the crops, as previously reported, were damaged by the recent floods. The harvesting of early rice and jute is proceeding, and on the whole a good outturn is expected. Prices continue almost stationary. In some districts new *aus* rice has come into the market. In the distressed districts the prices of the staple food-grain on which the famine wage is based are—Bankura (common rice) 7 to 9½ seers, Nadia (common rice) 7 seers (old) and 10 seers (new *aus*), Murshidabad (common rice) 7½ to 8½ seers (old) and 9 to 10½ seers (new *aus*), Khulna (common rice) 8 seers, Rajshahi (common rice) 7½ seers, Saran (barley) 10 seers 13 cuttacks, Champaran (barley) 11½ seers and (*rahar*) 11½ seers, Muzaffarpur (*makai* and *rahar*) 10 seers, Darbhanga (rice) 7½ seers, Sonthal Parganas (rice) 7 to 9 seers and (maize) 9 seers, Puri (common rice) 9 to 10 seers, Hazaribagh (rice) 6 to 7½ seers and (*mahu*) 13 to 24 seers, Palamau (rice) 8 seers, Manbhum (common rice) 7½ seers.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JULY 1897.

THE marked break in the rains, which began towards the end of June, with westerly winds and unusually high temperature over the whole Province, continued for some days in the beginning of July. It was followed by a period of wet weather, which lasted till after the middle of the month, and then a partial break set in, during which rainfall consisted of scattered showers only. This second break went on till near the end of the month, when general rain again commenced.

The first break, which was coming to a close on the 4th, was due to the formation of a low-pressure area over Assam and North Bengal. The effect on the wind system was seen in the westerly winds over the whole Province; and as at that time dry weather prevailed in Central India, these winds were dry and hot. In consequence during their existence the sky was cloudless, and day temperature was much above the normal, especially in the western districts. The second, but partial, break was due to different causes. Instead of pressure being relatively lowest in the north-east of the Province, it was higher there than that at any other stations, whether inland or on the coast. The pressure gradient was much less steep than usual during July, and the monsoon current was consequently weak both over the Province and the Bay.

The change which brought about a renewal of monsoon weather in both of these cases was connected with the formation of shallow depressions in the north of the Bay. The disturbances were very feeble and were not attended by stormy weather over the Bay. The first moved north-westward and was soon beyond the boundary of the Province, but the second took a northerly or north-north-easterly course, and filled up over the central districts. The general rain which fell in all districts after the westward movement of the first of these two depressions was maintained in Bengal and Bihar by a shallow land depression, which formed only two or three days after the previous one had left the Province. This land depression remained over the northern and central districts for about two days and then moved westward.

During the month, therefore, there were three shallow depressions, two of which formed over the north of the Bay and one in the north of the Province.

Owing to these rather important interruptions, which do not often occur in July, rainfall has not on an average been up to the normal. The only subdivision in which more than the average amount has been received is Orissa, where the excess is 11 per cent. In South-West Bengal, Behar, and Chota Nagpur rather more than 80 per cent. of the normal amount fell, while in the east of the Province the average fall was slightly below 80 per cent.

The month began with a rapid rise of pressure in Assam and North Bengal. The pressure distribution became much more normal, but the westerly winds continued with the high temperature which had been established during the last few days of June. On the 1st of July excess in mean temperature varied from 2° or 3° in the extreme east of the Province to 10° in Chota Nagpur. As the pressure gradient became more normal, easterly winds extended slowly westwards. They were more general in the eastern districts on the 2nd; but though temperature was falling, there was very little rain—only scattered showers. In the west the high temperature with excess between 5° and 10° was maintained. Owing to a slow to brisk fall of pressure on the 3rd and 4th, the change which had been in process during the two previous days was checked, and it was not till the 5th that easterly winds became general over the north of the Province. On that day the pressure distribution was fairly normal, but the first signs of the commencing disturbance were shown in the east of the Bay, where pressure was falling slowly, while there had been a slow to brisk rise elsewhere. Rainfall was then more general in the eastern districts, and temperature was not above the normal, but in the west excess was still between 5° and 10° .

The shallow depression continued to develop slowly on the 6th and 7th, and the centre was close to the Orissa Coast on the morning of the 8th, when pressure was about $\cdot 1$ inch below the normal at most of the coast stations in the north of the Bay. Showery weather had by that time become general in all districts, and temperature was above the normal by only small amounts. The cyclonic circulation of winds was regular, but they attained to no more than moderate strength. The centre was more to the north on the 9th, near Saugor Island, where pressure was $29\cdot 4$ inches, with defect of $\cdot 14$ inches, and a fairly steep gradient obtained over both the Bay and the Province. The depression then moved rapidly westward, and on the 10th ordinary monsoon weather prevailed, with easterly winds except in Orissa.

As the disturbance had been slight, it soon ceased to influence weather in Bengal even in the western districts. On the 11th winds were becoming south or south-west in Chota Nagpur, and a two-fold change occurred in pressure, viz., a brisk rise in Orissa and Chota Nagpur and a moderate fall in North and East Bengal. This was the beginning of the shallow land depression which had such an important influence in maintaining the rainfall till after the middle of the month. Though there was a fairly regular cyclonic circulation of winds over the Province on the 12th, the depression was not well defined

till the 13th, when its centre was near Bhagalpur, with defect in pressure of less than .1 inch. On the 14th it was in practically the same position, but had deepened somewhat, and on the 15th it was over the west of Behar, moving westward. During these three days, while the centre of the depression was over the Province, general heavy rain was falling, most so in the western and southern districts. The moist current from the Bay, set up by the depression, continued for some days; and though rainfall was becoming lighter, it was not till the 20th that it was at all scattered. From the time, therefore, of the commencement of the first depression over the Bay, about the 7th, till the 20th, there was general and at times heavy rain over the whole Province.

Owing to a steady slow increase of pressure on the days following the 16th, the distribution had recovered by the 19th, and a moderate excess prevailed over the Province and the north of the Bay. This gave a distribution of pressure more uniform than usual, and it became more so during the subsequent days, with lighter and more scattered rainfall except in the north-east of the Province. On the 22nd the difference from the normal varied from excess of nearly .2 inch in East Bengal to a small defect in the south-east of the Bay, and there was very little change in this arrangement till the 26th, when a brisk fall set in. There was then, as compared with the normal, a shallow depression over the south of the Bay. It was transferred rapidly north-westward, and was shown on the 29th as a very slight depression over the north-west angle of the Bay, moving northwards. The greatest defect was only .05 inch; but as there was a considerable excess in the south-east the gradient over the Bay was moderately steep. Continuing to move northwards, the depression became diffused over Bengal by the 30th, with a cyclonic circulation of light winds round a centre near Jessore; and on the 31st it had almost filled up, the residual depression being over North Bengal.

Rainfall was fairly general on the 29th; but as the depression moved northwards, it became more frequent and heavy, many stations reporting heavy falls on the 30th and 31st.

Pressure changes were never large throughout the month, owing to the occurrence of only very shallow depressions. At the beginning of the month pressure was highest in the south and lowest in the north-east, but a reversal occurred shortly after the middle, and a considerable excess developed over Assam and the east of the Province. Mean pressures are very nearly normal, a small excess prevailing, except in the west of South Behar, where there is a very slight defect.

Temperature, as stated above, was very high in the early part of the month, especially in the western districts, where mean daily excess was for several days as much as 10° . During the period of heavy general rain about the middle of the month, the dense cloud which then prevailed caused low day readings: at other times a fairly normal temperature obtained. Mean maximum values for the whole month are 4° above the normal in Chota Nagpur and the west of South Bihar, and from 1° to 3° elsewhere. Excess in mean minimum temperature is very uniform at about 1° . Means for the larger divisions are all above the normal, excess being 2.5° in Chota Nagpur, 1.9° in Bihar, 1.2° in South-West Bengal, 1° in Orissa, and rather less than 1° in North and East Bengal.

Rainfall.—Orissa is the only subdivision which on an average received more than the normal, and that was due to heavy falls near the coast. Excess was 1.33 inches. In the other subdivisions defect was about 2 inches except in East and North Bengal, where it was 3.6 and 4.1 inches respectively. Notwithstanding the marked break at the beginning of the month and the partial break towards the end, when only scattered showers were falling the number of rainy days, taking a rainy day as one on which a tenth of an inch or more has fallen, was not far short of the normal. The greatest deficiency was four days in South-West Bengal. This shows that the rainfall was well distributed during the second and third weeks, and was not due to any unusually heavy falls.

The area in which falls were most in defect, about 10 inches, is in the north of the Sonthal Parganas and the east of Behar. From there the deficiency diminishes in all directions, but is more than 5 inches only in the west of Behar and part of North Bengal. In the south-west there is an area of deficient rainfall with defect of about 5 inches, including parts of the Orissa Tributary Mahals and the Singbhum and Midnapore districts. Over the greater part of the remaining area a small defect prevails, the exceptions being the coast districts of Orissa, the 24-Parganas and Sundarbans, the west of South Bihar and the Jalpaiguri district, where falls are in excess by variable amounts up to 10 inches.

The total falls for the month are less than 5 inches in parts of Malda and the Sonthal Parganas, and between 5 and 10 inches in the central districts of Bengal proper and the greater part of North Bihar. In the Sundarbans, Backergunge and Noakhali falls generally vary between 10 and 20 inches, and in Chittagong they are between 20 and 25 inches. In North Bengal they as usual increase rapidly towards the hills, but this year they are more irregular, varying from 5 inches in part of Dinajpur to more than 50 inches at Buxa. There is also greater irregularity than usual in Chota Nagpur and South Bihar, but generally falls vary between 10 and 15 inches.

The following table gives a comparison of the falls in the various divisions during the month of July with the normal fall, the actual being given as a percentage of the normal fall. The table also shows the actual falls for each of the previous months of the year expressed in the same way, and the last column of the table shows the total of the falls

of the past seven months of the year in each division expressed as a percentage of the normal fall:—

The following table gives full data for the comparison of the actual and normal rainfall of the month of July in all districts of the Province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the monthly meteorological tables. The first column gives the normal or average district rainfall as determined from the rainfall observations of the past 25 years. The second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district. The third column expresses the ratio of the actual district rainfall of the past month to the normal rainfall as a percentage; and the fourth column gives the same information in a slightly different form, expressing as a percentage how much the district rainfall varied in excess or in defect from the normal rainfall:—

UNDER CLOTHING, bedding, wearing apparel, mattresses, carpets, etc., which are contaminated or suspected, should be disinfected in stoves at *normal pressure*, or at a pressure of from one and-a-half to two degrees, with or without the presence of steam.

Before a stove is passed as efficient for the purposes of disinfection, it should be subjected to a test, with the aid of a signal thermometer, showing the moment when the temperature in the middle of a mattress rises to at least 100° (centigrade).

To ensure that the disinfection is effective, this temperature must be maintained for from 10 to 15 minutes.

NOTE — All changes proposed in the existing rules are indicated in italics.

DRAFT.

In exercise of the powers conferred by sections 5 *and* 7 of the Indian Explosives Act (IV of 1884) and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to make the following rules to regulate the manufacture, possession and sale of explosives in the Lower Provinces of Bengal.

Nothing in these rules relating to the possession of explosives shall apply in any port, as defined in the Indian Ports Act, 1889, for which the Local Government may have made, or may make, special rules under the Indian Explosives Act (IV of 1884) to regulate the possession of explosives.

Nothing in these rules shall apply to the manufacture, possession or sale of any explosive—

(a) *by order of the Government, or*

(b) *by any person employed under the Government in the execution of the Indian Explosives Act (IV of 1884), or as a keeper of a magazine, artisan, soldier, sailor, policeman, or otherwise, or enrolled as a Volunteer under the Indian Volunteers Act (XX of 1869), in the course of his employment or duty as such.*

RULES UNDER THE EXPLOSIVES ACT, 1884, FOR THE MANUFACTURE, POSSESSION AND SALE OF EXPLOSIVES IN THE LOWER PROVINCES OF BENGAL.

PRELIMINARY.

1. For the purposes of these rules, explosives shall be classified as follows, namely:—

Class 1	Gunpowder.
Class 2	Nitrate-mixture.
Class 3	Nitro-compound.
Class 4	Chlorate-mixture.
Class 5	Fulminate.
Class 6	Ammunition.
Class 7	Firework.

And when an explosive falls within the description of more than one class, it shall be deemed to belong exclusively to the latest of the classes within the description of which it falls.

CLASS 1.—*Gunpowder Class.*

The term “gunpowder” means exclusively gunpowder ordinarily so called.

CLASS 2.—*Nitrate-mixture Class.*

The term “nitrate-mixture” means any preparation, other than gunpowder ordinarily so called, formed by the mechanical mixture of a nitrate with any form of carbon or with any carbonaceous substance not possessed of explosive properties, whether sulphur be or be not added to such preparation, and whether such preparation be or be not mechanically mixed with any other non-explosive substance.

The nitrate-mixture class comprises such explosives as—

Pyrolithe,
Fudrolithe,
Poudre saxifragine,

and any preparation coming within the above definition.

CLASS 3.—*Nitro-compound Class.*

The term “nitro-compound” means any chemical compound possessed of explosive properties, or capable of combining with metals to form an explosive compound, which is produced by the chemical action of nitric acid (whether mixed or not with sulphuric acid) or of a nitrate mixed with sulphuric acid upon any carbonaceous substance, whether such compound is mechanically mixed with other substances or not.

The nitro-compound class has two divisions.

Division 1 comprises such explosives as—

Nitro-glycerine,	Dualine,
Dynamite,	Glyoxiline,
Lithofracteur,	Methylic nitrate,

and any chemical compound or mechanically mixed preparation which consists, either wholly or partly, of nitro-glycerine or some other liquid nitro-compound.

Division 2 comprises such explosives as—

Gun-cotton ordinarily so called,	Cotton gunpowder,
Gun-paper,	Schultz's power,
Xyloidine,	Nitro-mannite,
Gun sawdust,	Pierates,
Nitrated gun-cotton,	Pieric powder,

Tonite (or cotton powder),

and any nitro-compound as before defined which is not comprised in the first division.

CLASS 4.—*Chlorate-mixture Class.*

The term “chlorate-mixture” means any explosive containing a chlorate.

The chlorate-mixture class has two divisions—

Division 1 comprises such explosives as—

Horsley's blasting powder,
Brain's blasting powder,

and any chlorate preparation which consists partly of nitro-glycerine or of some other liquid nitro-compound.

Division 2 comprises such explosives as—

Horsley's original blasting powder,	Hochstadter's blasting charges,
Erhardt's powder,	Reichen's blasting charges,
Reverley's powder,	Teutonite,
	Chlorated gun-cotton,

and any chlorate-mixture as before defined which is not comprised in the first division.

CLASS 5.—*Fulminate Class.*

The term “fulminate” means any chemical compound or mechanical mixture, whether included in the foregoing classes or not, which, from its great susceptibility to detonation, is suitable for employment in percussion-caps or any other appliances for developing detonation, or which, from its extreme sensibility to explosion and from its great instability (that is to say, readiness to undergo decomposition from very slight exciting causes), is especially dangerous.

The fulminate class has two divisions.

Division 1 comprises such compounds as the fulminates of silver and of mercury and preparations of these substances, such as are used in percussion-caps, and any preparation consisting of a mixture of a chlorate with phosphorus, or certain descriptions of phosphorus compounds, with or without the addition of carbonaceous matter, and any preparation consisting of a mixture of a chlorate with sulphur, or with a sulphurate, with or without carbonaceous matter.

Division 2 comprises such substances as the chloride and the iodide of nitrogen, fulminating gold and silver, diazobenzol, and the nitrate of diazobenzol.

CLASS 6.—*Ammunition Class.*

The term “ammunition” means an explosive of any of the foregoing classes when enclosed in any case or contrivance, or otherwise adapted or prepared so as to form a cartridge or charge for small-arms, cannon, or any other weapon, or for blasting, or to form any safety or other fuze for blasting, or for shells, or to form any tube for firing explosives, or to form a percussion-cap, a detonator, a fog-signal, a shell, a torpedo, a war-rocket, or other contrivance other than a firework.

The term “percussion-cap” does not include a detonator.

The term “detonator” means a capsule or case which is of such strength and construction, and contains an explosive of the fulminate-explosive class in such quantity that the explosion of one capsule or case will communicate the explosion to other like capsules or cases.

The term “safety fuze” means a fuze for blasting which burns and does not explode, and which does not contain its own means of ignition, and which is of such strength and construction, and contains an explosive in such quantity, that the burning of such fuze will not communicate laterally with other like fuzes.

The expression “safety cartridges” means cartridges for small-arms of which the case can be extracted from the small-arm after firing, and which are so closed as to prevent any explosion in one cartridge being communicated to other cartridges. *The term also includes rifle-calibre machine-gun cartridges if they are of the above description, whether they are for use with machine-guns having chambers identical with those of rifles or with machine-guns which have special chambers.*

The maximum gauge at which a small-arm cartridge can be accepted as “safety” is one inch. The following are the gauges of the machine-gun cartridges which may be accepted as “safety” :—

·303-inch cordite.

Martini-Henri rifle, solid case.

·45-inch Gardner, Gatling and Nordenfeldt, except Martini-Henri chambered guns.

·4-inch.

Cartridges of larger gauge are not safety cartridges.

The ammunition class has three divisions.

Division I comprises exclusively—

Safety cartridges,

Safety fuzes for blasting,

Fuzes for shells, and tubes friction for guns, provided there be no more than five fuzes or 25 tubes in one package, and that the package be a hermetically-sealed metal cylinder.

Railway fog-signals.

Percussion-caps.

Division 2 comprises any ammunition, as before defined, which does not contain its own means of ignition and is not included in Division 1, such as—

Cartridges for small-arms, which are not safety cartridges,

Cartridges and charges for cannon, shells, mines, blasting, or other like purposes,

Shells and torpedoes containing any explosive,

Fuzes for blasting, which are not safety fuzes,

Fuzes for shells,

Tubes for firing explosives,

War-rockets,

which do not contain their own means of ignition.

Division 3 comprises any ammunition, as before defined, which contains its own means of ignition and is not included in Division 1, such as—

Detonators,

Cartridges for small-arms, which are not safety cartridges,

Fuzes for blasting, which are not safety fuzes,

Fuzes for shells,

Tubes for firing explosives,

which do contain their own means of ignition.

By ammunition containing its own means of ignition is meant ammunition having an arrangement, whether attached to it or forming part of it, which is adapted to explode or fire the same by friction or percussion.

CLASS 7.—Firework Class.

The firework class has two divisions.

Division 1 comprises firework compositions, that is to say, any chemical compound or mechanically mixed preparation of an explosive or inflammable nature, which is used for the purpose of making manufactured fireworks, and is not included in the former classes of explosives, and also any star and any coloured fire composition, subject to the proviso hereinafter set forth.

Division 2 comprises manufactured fireworks, that is to say, any explosive of any of the foregoing classes and any firework composition, when such explosive or composition is enclosed in any case or contrivance, or is otherwise manufactured so as to form a squib, cracker, toy cap or amorce, serpent, rocket (other than a war-rocket), maroon, lance, wheel, Chinese fire, Roman candle, or other article specially adapted for the production of pyrotechnic effects or pyrotechnic signals or sound signals;

Provided that a substantially constructed and hermetically closed metal case containing not more than 1 lb. of coloured fire composition of such a nature as not to be liable to spontaneous ignition shall be deemed to be a "manufactured firework."

(c) the amount of explosives and of ingredients thereof wholly or partly mixed to be allowed at the same time within the boundaries of the magazine; and

(d) any special terms which the applicant may propose by reason of any special circumstances arising from the locality, the situation or construction of any buildings or works, or the nature of any process or otherwise.

(3) Upon receipt of the said application—

(a) The District Magistrate or Commissioner of Police, as the case may be, shall thereupon cause notice to be published of the application, and fix a date on which any person shall be heard objecting to the establishment of a magazine on the proposed site who have not less than seven clear days before the day of hearing sent to the said District Magistrate or Commissioner of Police, and to the applicant, notice of their intention to appear and object with their names, address and calling, and a short statement of the grounds of their objection.

The Local Government may thereupon grant the license applied for, either in accordance with the recommendation of the District Magistrate or Commissioner of Police, or with the addition of any additional restrictions and precautions as may be deemed proper, or may refuse such license:

The 24th August 1897.

No. 106 Marine.—In exercise of the power conferred by section 2 of the Epidemic Diseases Act, III of 1897, and by the Notification of the Government of India in the Home Department, No. 302, dated the 4th February 1897, the Lieutenant-Governor of Bengal has been pleased to prescribe as a temporary measure the following rules for quarantine against plague, and for the medical inspection, isolation, observation, and surveillance of persons suffering from, or suspected of being infected with, plague.

These rules shall take effect from the 26th August 1897 in the Port of Calcutta, and shall supersede all previous rules.

I. Definitions :—

- (1) *Health Officer.*—In these rules "Health Officer" means the Health Officer of the Port of Calcutta, and includes an Assistant Health Officer and any person appointed by name or in virtue of his office, to perform the duties of an Assistant Health Officer.
- (2) *Infected ship.*—Any ship with plague on board, or on board which one or more cases have taken place within 12 days before her arrival, will be considered *infected*.
- (3) *Suspected ship.*—Any ship, on board which there has been a case of plague at the time of departure, or during the voyage, but on which no fresh case has occurred for 12 days before her arrival, will be considered *suspected*.

- (4) *Healthy ship*.—Any ship, even though coming from an infected port, which has had no death or case of plague on board, either before departure, during the voyage, or on arrival, will be considered *healthy*.
- (5) *Observation*.—The term "observation" means that the persons subjected to it will be segregated in a lazaretto or isolation camp, till they have obtained free *pratique*.
- (6) *Surveillance*.—The term "surveillance" means that the persons subjected to it will not be isolated; they will at once obtain free *pratique*, but, on arriving at their destination, they will be kept under medical supervision.

II. *Hoisting of yellow flag*.—The Commander of every vessel, including buggalows or other native craft, (a) arriving from an infected port, or (b) having plague on board, or (c) on board of which one or more cases of plague have taken place within 12 days of her arrival, shall, on arrival at the Sandheads, hoist a yellow flag, and indicate by signal the port from which she has come, and shall keep such flag and signal flying until permitted in writing by the Health Officer to haul it down. The Pilot, on going alongside such vessel, shall direct the flag prescribed above to be hoisted, if that has not already been done.

III. *Prohibition of communication*.—The Commander shall not, without first having obtained permission as hereinafter provided, allow any communication except orally with the shore or any other vessel or boat, excepting only with the boat supplying the Pilots* from the Pilot Brig, and in that case, communication shall be limited to receiving on board the Pilot, his Leadaman, servant and baggage.

IV. *Stoppage at Diamond Harbour*.—If there is any case of sickness on board, and the Pilot has reason to believe that it is plague, he shall telegraph to the Health Officer from Saugor, and not proceed beyond Diamond Harbour without the permission of the Health Officer.

V. *Stoppage at Mateabrooj*.—If the Pilot has no reason to believe that there is any one suffering from plague on board, he shall bring the vessel up the river to Mateabrooj, and shall anchor it there till the Health Officer has visited it.

VI. *Inspection by Health Officer*.—The Health Officer, as soon as he has received information of the stoppage of the vessel at Diamond Harbour, or of its arrival at Mateabrooj, shall visit it and ascertain by enquiry from the Commander or the Medical Officer on board, or from other sources of information, whether any person on board is suffering or has suffered from plague. For this purpose, he may demand a declaration, on oath, from the Doctor of the ship, or, failing him, from the Captain, that there has been no case of plague on the ship since her departure.

VII. Rules relating to infected ships:—

- (1) If an infected ship has, under Rule IV, been stopped at Diamond Harbour, she will await the orders of the Health Officer there. If, under Rule V, she has been brought up to Mateabrooj, the Health Officer will direct the Commander to take her to the Sanitary station at Diamond Harbour, or elsewhere as may be appointed by Government, and to await orders there.
- (2) On arrival at the Sanitary station, the sick will be immediately disembarked and isolated under the order of the Health Officer.
- (3) The other persons on board shall also be disembarked and, when necessary, kept under observation at the Sanitary station for a period varying, in the discretion of the Health Officer, according to the sanitary condition of the ship and the date of the last case. Such period must not exceed ten days from the date of the last case, whether that occurred on boardship or during the period of observation on shore. It is also in the discretion of the Health Officer to allow such persons to proceed to their destination on their giving a written undertaking, in the form annexed as Appendix I, to submit themselves to surveillance by the Medical Officer (if any) appointed for the purpose, at their destination, for a period of ten days from the date of the arrival of the ship. The undertaking shall be executed in duplicate, and one copy shall be sent by the Health Officer to the Medical Officer concerned.

No one arriving on the vessel shall be left on board except those persons whose presence is necessary for the care of the vessel.

- (4) The soiled linen and personal effects of the crew and passengers, which, in the opinion of the Health Officer, may be considered as infected, shall be disinfected, in accordance with the rules contained in Appendix II.
- (5) The bilge-water will be pumped out after disinfection, and good drinking-water will be substituted for the water stored on board.
- (6) All parts of the ship, which have been inhabited by plague-patients, will be disinfected; and the other parts of the ship may also be disinfected at the discretion of the Health Officer.
- (7) When these rules have been fully complied with, the Health Officer shall, by an order in writing under his hand, to be delivered to the Commander, permit the yellow flag to be hauled down.

VIII. Rules relating to suspected ships:—

- (1) If a suspected ship has, under Rule IV, been stopped at Diamond Harbour, she will await the orders of the Health Officer there. If, under Rule V, she has been brought up to Mateabrooj, the Health Officer will go on board of her there.
- (2) The passengers and crew will be medically inspected by the Health Officer.
- (3) The soiled linen and personal effects of the passengers and crew which, in the opinion of the Health Officer, may be considered as infected, will be disinfected in accordance with the rules contained in Appendix II.
- (4) The bilge-water will be pumped out after disinfection, and good drinking-water will be substituted for the water stored on board.
- (5) All parts of the ship, which have been inhabited by plague-patients, will be disinfected; and the other parts of the ship may also be disinfected at the discretion of the Health Officer.
- (6) Passengers who are suspected by the Health Officer to be infected with plague may be detained under observation in an isolation hospital appointed for the purpose, for ten days from arrival of the ship, or if plague occurs among them while under observation, from the date of the last case.
- (7) The crew will not be allowed to land, except on duty, for ten days from the arrival of the ship.
- (8) Passengers who are passed on medical inspection as healthy, will be allowed to proceed to their destination on their giving a written undertaking, in the form annexed, to submit themselves to surveillance by the Medical Officer (if any) appointed for the purpose, at their destination, for a period of ten days from the date of the arrival of the ship. The undertaking shall be executed in duplicate, and one copy shall be sent by the Health Officer to the Medical Officer concerned.
- (9) When these rules have been fully complied with, the Health Officer shall, by an order in writing under his hand, to be delivered to the Commander, permit the yellow flag to be hauled down.

IX. Rules relating to healthy ships:—

- (1) A healthy ship shall be given free *pratique* at once, whatever may be the nature of her bill of health.
- (2) Such a ship may, at the discretion of the Health Officer, be subjected to the measures prescribed in Rules VIII (2), VIII (3) and VIII (4), but the ship itself may not be disinfected as in Rule VIII (5), except with the consent of the Commander or Agent.
- (3) Passengers who, on medical inspection, are suspected by the Health Officer to be infected with plague, may be detained under observation in an isolation hospital appointed for the purpose, for ten days from the date on which the ship left an infected port, or, if plague occurs among them while under observation, from the date of the last case.
- (4) The crew will not be allowed to land, except on duty, for ten days from the date on which the ship left an infected port.
- (5) The crew and passengers may, at the discretion of the Health Officer, be subjected to surveillance in the manner described in Rule VIII (8), for a period of ten days from the date on which the ship left an infected port.
- (6) When these rules have been fully complied with, the Health Officer shall, by an order in writing under his hand, to be delivered to the Commander, permit the yellow flag to be hauled down.
- (7) None of the above measures will be considered necessary when the ship has been given free *pratique* at Colombo or other intermediate port.

X. Ships carrying a Doctor or a stove.—In exercising the discretion vested in him by the rules under heads VII, VIII and IX above, the Health Officer should take into consideration the fact of there being a Doctor, or a disinfecting apparatus (stove), on board the ship in question.

XI. Rules relating to crowded and insanitary ships.—Crowded ships, ships carrying emigrants or return pilgrims, and ships which appear to be in an insanitary state may, at the discretion of the Health Officer, be treated as suspected ships under head VIII.

XII. Right of ship to put back to sea.—Any ship objecting to submit to the obligations imposed by these rules will be free to put back to sea. Such objection must be notified on or before arriving at Diamond Harbour.

XIII. Rules applying to ships claiming right to put back to sea.—If ships claiming the right to put back to sea desire to disembark passengers or land goods, they must submit to the rules relating to suspected ships.

XIV. Provisions and stores.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine, to be subsequently removed by members of their crews.

Secy. to the Govt. of Bengal.

APPENDIX I.

I (name) of (place) do hereby declare that it is my intention at once to proceed to (place), and I agree to submit myself to medical supervision by (name or office of Medical Officer appointed for the purpose) for a period of ten days from (date from which period is to be reckoned).

Signed

In the presence of

Health Officer.

APPENDIX II.

Instructions for disinfection.

1. Personal effects, rags, infected bandages, papers, and other articles without value should be destroyed by fire.

2. Under-clothing, bedding, wearing apparel, mattresses, carpets, &c., which are contaminated or suspected, should be disinfected in stoves at normal pressure, or at a pressure of from one and-a-half to two degrees, with or without the presence of steam.

Before a stove is passed as efficient for the purposes of disinfection, it should be subjected to a test, with the aid of a signal thermometer, showing the moment when the temperature in the middle of a mattress rises to, at least, 100° (centigrade).

To ensure that the disinfection is effective, this temperature must be maintained for from 10 to 15 minutes.

3. Disinfecting solutions—

(a) Solution of corrosive sublimate, of 1 part in 1,000, with the addition of 10 parts of chloride of soda.

The solution should be coloured with aniline dye or indigo. It should not be placed in metal vessels.

(b) A 5 per cent. solution of pure crystallized carbolic acid, or 5 per cent. of crude commercial carbolic acid, in a warm solution of soft soap.

(c) Fresh slaked-lime (1).

4. Special instructions to be observed in the employment of disinfecting solutions.

The linen, clothing and articles, soiled by the excreta of patients, should be soaked in the solution of corrosive sublimate. The solution of pure carbolic acid, and the solution of soap and carbolic acid, are equally suited to the purpose. The articles should remain in the solution for at least six hours.

Articles which cannot be subjected to the temperature of the stove (100° centigrade) without injury, such as leather goods, wooden articles stuck together with glue, felt, velvet, silk, &c., should be washed with the solution of corrosive sublimate; coins can be disinfected with the solution of soap and carbolic acid.

Persons engaged in nursing the sick should wash their hands and faces with the solution of corrosive sublimate, or with one of the carbolic solutions.

The carbolic solutions will be useful, more particularly for disinfecting articles, such as metals, instruments, etc., which can neither be subjected to a temperature of 100° centigrade, nor placed in contact with corrosive sublimate.

Slaked-lime is particularly recommended for disinfecting excreta. Expectorated matter should be burnt.

5. Disinfection of ships with plague-patients on board.

The cabin or cabins, and all parts of the ship occupied by the sick or suspected, should be cleared out, and all articles in them should be treated as described above.

The partitions should be disinfected with the solution of corrosive sublimate, with an addition of 10 per cent. of alcohol. The washing should commence from the top, horizontally, and be continued downwards, so that the whole surface of the partition becomes covered with a coating of minute drops.

The boarding should be washed with the same solution.

Two hours after, the walls and flooring should be washed over with plenty of water.

6. Disinfection of the hold of an infected ship.

To disinfect the hold, sulphate of iron, in quantity sufficient to neutralize the sulphuretted hydrogen, should first be thrown in, the bilge-water should be pumped out, and the hold washed with sea-water. Solution of corrosive sublimate should then be thrown in.

The bilge-water should not be pumped out while the ship is in port.

(1) To get very strong slaked-lime, take lime of good quality, slake it, by moistening it gradually, with half its weight of water. When the operation is completed, put the powder in a carefully-corked receptacle, and place it in a dry spot. As each kilogramme of lime absorbs 500 grammes of water in order to become slack, it acquires a volume of 2 litres 200, and it is sufficient to dilute it with double its volume of water, say 4 kilogrammes 400 grammes, to obtain a white-wash, which will be of about 20 per cent. strength of lime.

POLLUTION OF THE RIVER WATER.

The Hon'ble BABU SURENDRANATH BANERJEE asked:—

I have the honour to call attention to the reply given by the Hon'ble Mr. Risley in this Council on the 11th July, 1897, regarding the pollution of the river Hooghly by the discharge into it of the sewage of mills on both banks of the river, and to enquire what progress has been made with a view to prevent the further pollution of the river?

Has the attention of the Government been called to the pollution of the river caused by the new mill which has been started at Tittaghar? Is it the case, as stated in one of the newspapers, that the waste jute and kerosine oil discharged into the river by this mill near Charnock pollute the river water to such an extent as to render it unfit for drink? If so, will the Government be pleased to take the necessary steps with a view to the prevention of the nuisance?

The Hon'ble MR. BOLTON replied:—

"In reply to the first part of the question asked by the Hon'ble Member, I have to say that in accordance with the answer given by the Hon'ble Mr. Risley in this Council on the 11th July, 1896, the general question of the pollution of the river Hooghly and the *khals* and small streams running into it, by the discharge of sewage, trade refuse and other noxious matter from the various mills and factories situated in the neighbourhood, was referred to the Sanitary Board for their opinion. The Board, while expressing their opinion that the papers submitted to them did not supply any grounds for differing from the conclusions arrived at by Government previously, as stated in Government Resolution No. 524M, dated the 8th February, 1895, suggested that the Sanitary Commissioner should be consulted, and a special medical officer deputed to make a thorough enquiry in the matter. The Sanitary Commissioner was then requested to depute for this purpose a Deputy Sanitary Commissioner with definite instructions for his guidance; but in consequence of the unavoidable transfer of the Deputy Sanitary Commissioner to plague duty, and the deficiency in the staff of medical officers, it has not been possible as yet to complete the enquiry. The matter has not, however, escaped attention, and is still under the consideration of the Sanitary Commissioner.

"The reply to the second part of the Hon'ble Member's question is, that the Government has no information as to the alleged pollution of the river from a new mill started at Tittaghar, but the Sanitary Commissioner will be asked to enquire into this matter in connection with the general question."

OMISSION OF LEGAL PRACTITIONERS FROM JURY LIST.

The Hon'ble BABU SURENDRANATH BANERJEE asked:—

Will the Government be pleased to state whether, as stated in the *Itabadi* newspaper of the 2nd ultimo, a circular letter has been issued directing District Officers to strike out the names of all legal practitioners from the list of Jurors? Having regard to the fact that the success of the jury system in Bengal is largely dependent upon the association in the practical working of the system of men of intelligence and culture, will the Government be pleased to reconsider its orders in this respect?

The Hon'ble MR. BOLTON replied:—

"In reply to the Hon'ble Member's question I have to say that instructions were issued to the local officers to give effect to the order exempting legal practitioners from service as Jurors or Assessors. The Government has no intention of withdrawing the order."

CONDITION OF RAILWAY PLATFORMS.

The Hon'ble BABU SURENDRANATH BANERJEE asked :—

(a) I have the honour to call the attention of the Government to the reply given in this Council on the 3rd April last to a question asked by Rai Eshan Chandra Mittra Bahadur regarding the condition of the platforms at Sheoraphuli, Bhadeswar and Khana Junction. Is the Government aware that no action has been taken in the matter by the Railway authorities, and that the platforms are still in the condition in which they were before to the serious inconvenience of passengers, especially of Hindu ladies?

(b) Will the Government be pleased to state if it has received any communication from the Railway authorities which the Government was expecting at the time when it gave the reply? And, if so, will the Government lay it on the table?

(c) Will the Government take the necessary steps to the speedy removal of the grievance referred to in this question?

The Hon'ble MR. BOLTON replied :—

“The reply received from the Agent of the East Indian Railway to the communication addressed to him by this Government is laid on the table. It seems to the Lieutenant-Governor that the Agent has given good reasons for raising the platform only at the Sheoraphuli Station.”

No. 3968, dated Calcutta, the 13th April, 1897.

From—COLONEL R. GARDINER, R.E., Agent, East Indian Railway Company,
To—The Secretary to the Government of Bengal, Public Works (Railway) Dept.

I HAVE the honour to acknowledge your No. 604R of 5th instant, and to state that the question of raising the passenger platforms at Bhadreswar, Sheoraphuli and Khana Junction is still under consideration, and I am unable as yet to give a definite reply.

2. The point raised is one with very wide bearings. Admit that it is a matter of sufficient public importance for Government to intervene and order high level platforms at these stations, and the same convenience will be demanded elsewhere.

3. The height of platforms at stations between Howrah and Khana Junction vary between one foot and three feet above rail level. The older stations have all comparatively high level platforms, varying between 2 feet 6 inches and 3 feet: where stations have been interpolated, low level platforms have as a rule been supplied. It is of course a convenience to have the floor of the carriage and the platform on the same level, but this is a convenience seldom given either in this Country or in Europe. On the Continent of Europe platforms are, as a rule, only a few inches above rail level. At Sheoraphuli the platforms actually vary between 1 foot 3 inches and 1 foot 6 inches; at Bhadreswar between 1 foot 1 inch and 1 foot 3 inches; at Khana Junction between 1 foot and 1 foot 5 inches above rail level. The Government of India latest standard dimensions lay down that low level platforms (that is at minor stations) are, as a minimum, to be flush with rails; as a maximum 1 foot 2 inches above the same. High level platforms (at important stations) to be as a minimum 2 feet 6 inches above rail with a maximum of 2 feet 9 inches.

4. To raise all the passenger platforms between Howrah and Khana Junction to full height would probably involve an average expenditure on platform alone of some Rs. 2,000 per station, with further consequential expenditure in connection with buildings and approaches, that I am not at present prepared to estimate. It would certainly involve an outlay of close on half a lakh of rupees for what is seemingly rather a sentimental objection. The actual inconvenience amounts to little more than what every one has to encounter in stepping into an ordinary horse carriage or going up and down stairs in a house not conveniently situated entirely on ground level, and the inconvenience, whatever it amounts to, is only experienced on the comparatively rare occasions on which a railway journey is undertaken.

5. As stated in the opening paragraph of this letter, I am having further enquiries made on the subject; but with the large expenditure that is still necessary in connection with the line, I am not disposed to recommend embarking on the heavy expenditure that raising our platforms generally would involve without greater evidence of the requirement than we have yet been given. Very special cases might be given exceptional treatment, but it is essential that it should be made very plain that they are to be rare exceptions.

No. 5170, dated Calcutta, the 22nd April, 1897.

From—COLONEL R. GARDINER, R.E., Agent, East Indian Railway Company,
To—The Secretary to the Government of Bengal, Public Works (Railway) Dept.

IN continuation of this office No. 3968 of the 13th April, 1897, I have the honour to attach a copy of a statement showing the average daily passenger bookings at certain of the more important stations between Howrah and Khana Junction and the height of the passenger platforms thereat. From a consideration of these figures, I am of opinion that Seoraphuli has a claim to high level platforms, and I will recommend the same to the Board for sanction. Neither Bhadreswar nor Khana Junction have at present a traffic that justifies any special action on their behalf.

ESTATES PARTITION BILL.

The Hon'ble MR. FINUCANE presented the Final Report of the Select Committee on the Bill to amend the law relating to the Partition of Estates.

The Hon'ble The PRESIDENT said:—"It appears to me that in the List of Business the items have been, unfortunately, put in the wrong order, as item 4 should stand as item 2. But before I call upon the Hon'ble Mr. Finucane to move that the Report of the Select Committee on this Bill be taken into consideration, I have to say that I think the third item as it stands on the List, which is a proposal made by the Hon'ble Babu Surendranath Banerjee, is not in order. My reason is, that Rule 39 of the Rules for the Conduct of Business of this Council provides a procedure of its own. That Rule runs as follows:—

'The Report shall be taken into consideration by the Council as soon as conveniently may be, but any Member may object to its being so taken into consideration when he has not been furnished for a week with a copy of the Report; and such objection shall prevail, unless the President, in exercise of his discretion, allows the Report to be taken into consideration.'

"It seems to me that this being the procedure as given under that Rule, it is not open for any Member to bring a matter of this kind before the Council by way of a motion. I mention this now in order to give the Hon'ble Member an opportunity, which I think the Rules afford him, of making the objection immediately after I call upon the Hon'ble Mr. Finucane."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I bow to Your Honour's opinion."

The Hon'ble MR. FINUCANE also moved that the Report be taken into consideration, and that the clauses of the Bill be considered in the form recommended by the Select Committee. He said:—

"Sir, when this Bill was introduced in Council sixteen months ago, I endeavoured to explain its objects and reasons. I stated that it had been under discussion for more than five years, and that there was no desire on the part of Government to rush it through Council.

"The Bill then introduced was published in the Gazette and widely circulated for opinions among Government Officers and Public Associations. Numerous and valuable criticisms were received on it which were considered with great care by the Select Committee.

"That Committee made some important changes in the Bill as originally introduced and presented a preliminary report in January last with the Bill as modified by them.

"The Select Committee which contained Experts on the subject, both official and non-official, unanimously agreed to the provisions of the Bill as amended except on one point, namely, the amount of the proposed limit to the partibility of Government revenue.

"Their report and the Bill as amended have since been published and circulated for criticism.

"The opinions received have been considered by the Select Committee, with the result that some slight verbal modifications have been made in certain sections and that the limit of Rs. 100 proposed in the original Bill and of Rs. 20 proposed in the Bill as at first amended by the Select Committee has been still further reduced.

"The proposal of the Select Committee now is that partition of an estate shall not be allowed—

- (a) if the annual amount of land revenue for which the separate estate of any of the proprietors would, after partition, be liable would not exceed Rs. 10, or
- (b) if after separation of the applicant's interest the annual amount of the land revenue for which the separate estate of the remaining proprietor or proprietors would be liable, would not exceed Rs. 5.

"The Bill as now amended has received the unanimous approval of the Select Committee, and it is hoped will be also unanimously accepted by the Council.

"The Bill is one of details for Experts to settle, (with which details the Council generally will probably not care to be troubled) except on two points, namely, (1) the provisions of Chapter VI relating to a survey and a record of existing rents and assets, and (2) the provisions of section 11 relating to restrictions on partibility of revenue. Chapter VI as it now stands has been accepted by all the Officials and Associations consulted without a dissentient voice. The restriction now proposed on partibility of revenue is, it will, I think, be conceded, the lowest that is compatible with the principle of imposing any restriction at all which principle was affirmed when the Bill was referred to the Select Committee.

"In deference to the views of the Landholders' Associations, the limit originally proposed has been very much reduced, and as that now suggested has been accepted by the representatives of the zamindari interests in the Select Committee, it is hoped the Council will have no difficulty in accepting it also. If this be so, the Bill in its present shape will, it is hoped, be unanimously approved.

"I observe that the Hon'ble Surendranath Banerjee and the Hon'ble Norendra Nath Sen think that the consideration of the clauses of the Bill should be postponed. If these Hon'ble Members have any specific amendments to propose or any improvements to suggest, I am willing to admit that time should be given for the consideration and discussion of their amendments. But if Hon'ble Members have no amendments to propose, I would submit that it is not reasonable to ask this Council to assemble again merely because it is possible that at some future time amendments may suggest themselves to Hon'ble Members which they are not prepared to bring forward now.

"Many of the official and non-official Members may be put to much inconvenience by having to attend meetings of Council. Some of the former have important duties on tour in the Mufassal from which they may have to be recalled to attend meetings of Council, and some of the latter may have to come from long distances to Calcutta. If there is any real necessity for their doing so, the inconvenience they may be put to, as a matter of course, a minor consideration; but if there is not any necessity for putting them to inconvenience, and Hon'ble Members do not intend to propose any specific amendments in the Bill, I hope they will see their way to allowing it to be passed unanimously at the present meeting."

The Hon'ble Babu SURENDRANATH BANERJEE said:—"I wish I could accept the invitation of the Hon'ble Member in charge of the Bill, but as far as I am personally concerned, I must say that I have not had sufficient time to go through the Bill, and when I have stated the facts before the Council, I think the Council will be of opinion that I have not had sufficient opportunity for studying a Bill of this importance and magnitude. Rule 39 to which I refer, and with which I am concerned, distinctly contemplates that Hon'ble Members should have the opportunity of studying the Report of the Select Committee for at least a week. With the permission of Your Honour I will read the words of Rule 39, which run as follows:—

'The Report shall be taken into consideration by the Council as soon as conveniently may be, but any Member may object to its being so taken into consideration when he has not been furnished for a week with a copy of the Report, and such objection shall prevail, unless the President, in exercise of his discretion, allows the Report to be taken into consideration.'

"I only received a copy of this Report on Monday last; and I think my hon'ble friend to the left (Babu Kali Charan Banerjee) received his either on Sunday or Monday. At any rate, it was not put into my hands till Monday; and though other Members may have had time to consider this Report, and were in a position to consider it carefully, I certainly have not had a week's time to study it before the meeting of the Council. I must say that, so far as my experience goes, it has been the practice, I was going to say the invariable practice, of this Council, for Reports of Select Committees to be laid upon the table for at least a week, except in the cases of non-contentious Bills. I do not think that it can be urged that this is a non-contentious Bill. This Bill has given rise to considerable discussion. The papers before us disclose the fact that even amongst the highest Officers of Government, there is considerable difference of opinion in regard to the provisions of this Bill. I do not see what necessity there is for departing from what is the invariable practice of the Council, namely, to give Hon'ble Members sufficient time for the consideration of the Report of the Select Committee, especially when we admit, in connexion with the Bill before us, that it affects a large and important section of the community and has given rise to considerable differences of opinion. I do not think that the Hon'ble Member in charge of the Bill will find himself in a position to get over this difficulty. I myself would have liked to have consulted the various District Boards and other gentlemen interested in this Bill. Many of them have no doubt given their opinions, but it is one thing for the Government to collect opinions, and quite a different thing for elected Members to approach their constituents for this purpose. I fail to see what possible harm can accrue to the Government, if the consideration of this Bill is postponed for a week or a fortnight. The Bill may be taken up at the end of the month or even later on. If you hurry this Bill through Council, I have not the smallest hesitation in saying

that the action of the Government will be open to a great deal of misconstruction, and considerable hardship will be inflicted upon those classes whose good-will it is the interest of the Government to secure in connexion with this Bill. As elected Members in intimate touch with the people, it is our duty to raise this warning-note, and I hope the Government will see its way to allow of an adjournment of the matter in order that the Bill and the Report may be dealt with at a future meeting of the Council."

The Hon'ble The PRESIDENT said:—"I regret I am not able to accept the objection of the Hon'ble Member who has just spoken. The Bill, as the Council have heard from the Hon'ble Member in charge of it (Mr. Finucane), has been before the Council for sixteen months, and I think I am not wrong when I say that during the whole of those sixteen months, with a small exception, the Hon'ble Member who objects has been a Member of this Council. It appears to me, therefore, that he has had ample opportunities of consulting his constituents, and the amendments made by the Select Committee are very few, and for the most part unimportant. They are such that a very small amount of consideration would be required to estimate their propriety, in addition to the consideration which the Hon'ble Member has no doubt given to the Bill during the course of those sixteen months. The one important change is a change in section 11 of the Bill with reference to the limit. In that instance the explanation given by the Hon'ble Member in charge of the Bill has given to the Council the history of the change, and he has explained that as it now stands, a large concession has been made to the landholding interest. This section was accepted by the representatives of that interest who sat in Select Committee, and in fact, it does not differ very much from a suggestion which was made by one of those representatives. For these reasons it does not appear to me to be necessary to adjourn this matter, as although the Hon'ble Member has not had these papers in his hands for a complete week, the deficiency is comparatively small. For these reasons, I decide that the Report of the Select Committee be taken into consideration."

The Hon'ble BABU NORENDRA NATH SEN said:—"After what has fallen from Your Honour, I think it is hopeless for me to expect any concession from Your Honour. However, in making this motion, let me not be misunderstood. It is far from my intention to be obstructive in the least. The importance of the Bill as affecting large classes, having anything to do with the joint ownership of land both as owners and tenants, cannot be exaggerated, and when I say this much, I think I say enough against the Bill being rushed through the Council. When over and above this, I frankly put forward my view as a new Member that I cannot conscientiously give a vote upon this Bill unless sufficient time is allowed me to study all the papers bearing on the subject, and when I appeal to Your Honour, who has been always so distinguished for fair-mindedness, to adjourn the debate upon this Bill, I am sure I do not appeal in vain, but, on the contrary, enlist Your Honour's sympathy on behalf of my motion. I contend that it is simply fair, at least to the new Members, that they should be given time enough to go through the enormous mass of papers, containing the literature on the subject, especially when such literature happens to be of a debatable character. I have no desire at present to go into the merits of the Bill, but when the time comes, I may have a great deal to say, especially in connexion with section 11 of the present Bill, as the proposed limit of Rs. 10 is even much higher than that contained in the Assam Regulation I of 1896. I may also have much to say in connexion with some other sections of the Bill which I may call the procedure sections. It may be necessary, on the part of some of us, to send in timely notices of amendments after a careful consideration of the papers relating to the Bill. I think it is due to the large body of men who may be affected by the Bill, that the Bill, as amended by the Select Committee, together with their final report, should be published in the official Gazette before the Bill is passed into law, so that they may have an opportunity of making themselves acquainted with its provisions, and the recommendations of the Select Committee, as embodied in their final report, and of expressing their opinion on the Bill, if necessary. Besides, I fail to see what necessity there is for hurrying this Bill through the Council. The Bill as at present framed, will be more a source of administrative convenience than anything else. What I

have said will, I trust, be sufficient to convince Your Honour of the reasonableness of my motion. I therefore move 'that the consideration of the Final Report of the Select Committee on this Bill be postponed for two weeks, and in the meantime, that the Bill, as amended, be published in the[Gazette.]'

The Hon'ble MR. FINUCANE said:—"If there is a feeling in the Council that the consideration of the clauses of the Bill be put off, Government will have no objection, but if the general feeling of the Council is that we should now pass the Bill, then I shall make the motion which stands in my name that the Bill be passed into law."

The Hon'ble MR. BOLTON said:—"My own view is that the motion for an adjournment should be agreed to, but the condition should be made that the postponement shall not extend beyond this Session, and that the Bill must be discussed and passed this Session."

The Hon'ble MR. FINUCANE said:—"I have no objection to that, but I think the proposal for the re-publication of the Bill is perfectly useless."

The Hon'ble BABU NORENDRA NATH SEN said:—"I withdraw that part of my motion if the postponement I ask for is granted."

The Hon'ble MR. FINUCANE said:—"I suppose that if Hon'ble Members have any amendments, they will give early notice of them."

The Hon'ble MR. BOLTON said:—"The proper course for the Hon'ble Members will be for both to send in their amendments. Many of these may be eliminated after personal consultation with the Hon'ble Member in charge of the Bill, and when we come to the actual debate, the number may be reduced to two or three, a great deal of time being thus saved to the Council."

The Hon'ble The PRESIDENT:—"Do I understand that the Hon'ble Member is prepared to abandon the second part of his motion, that is to say, that the Bill be re-published?"

The Hon'ble BABU NORENDRA NATH SEN said:—"Yes, I do."

The Hon'ble MR. GRIMLEY said:—"I should like to say that I am in favour of the proposal to postpone the consideration of the Bill. Although it has been considered by the Select Committee most carefully, section by section, still having regard to the importance of the questions at issue it is desirable that Hon'ble Members, who have not taken any part in previous discussions, should be allowed time to give the Bill the attention which it deserves. Their request is reasonable. I think we should lose nothing by allowing them a little time to consider the Bill. The postponement however should only be for a short period, say, for a week or fortnight."

The Hon'ble MR. FINUCANE said:—"It may be postponed to a date to be fixed later, but which will be before the termination of this Session."

The Hon'ble MR. BOLTON said:—"It may be postponed to the next meeting of the Council, without fixing any date to-day."

The Hon'ble The PRESIDENT said:—"The amendment of the Hon'ble Member now runs as follows:—'That the consideration of the Final Report of the Select Committee be postponed.' As it appears from the speech of the Hon'ble Member that he has some substantial objection to raise to the Bill, I shall not oppose his proposition. At the same time, of course, I am unable to modify or withdraw any of the remarks which I have just made, but I hope that on the next meeting of the Council we shall be able to pass the Bill unanimously."

The Hon'ble BABU NORENDRA NATH SEN moved that the consideration of the Final Report of the Select Committee be postponed.

The Motion was put and agreed to.

The Council adjourned to a date to be notified hereafter.

CHOTA NAGPUR TENANCY BILL.

The Hon'ble Mr. GRIMLEY in presenting the Report of the Select Committee on the Bill to regulate the enhancement of rents, the commutation of predial conditions or services, and the registration and resumption of intermediate tenures, in parts of Chota Nagpur, said:—

“It is not necessary to make any lengthy remarks, for when I last had the honour of addressing this Council on the subject, I entered upon a full description of the circumstances which led up to the proposed measure. I gave an account of a long series of disputes between the aboriginal cultivators of the soil and their alien landlords—disputes culminating in a serious agitation which menaced the peace of the country, and gave much trouble to the district authorities. There were faults on both sides: the zamindars for their part demanding more than they were entitled to get, and the raiyats in their turn refusing to pay their legitimate dues, and in some instances claiming to hold land at a quit-rent direct from Government, without the intervention of any zamindar, and seeking to put back the clock of time several centuries and revert to an age when landlords and rents were unknown. The disputes to some extent were traceable to the peculiar system prevailing in Chota Nagpur, under which rents are payable in money, in kind, and in service. The payments in kind are contributions of the produce of the land and stock, tithes of all sorts, pots of milk, vessels of ghee, measures of dhan and rice, cotton, sheep, goats, buffaloes, and here and there a fighting cock in those parts of the country where cock-fighting is a favourite pastime. These contributions are usually termed *rakumats* and are recognised by the Courts as rent. When the landlords and tenants are on friendly terms, the quantity is determined by the good-will of both: but when there is any tension disputes arise, and the Courts find a difficulty in arriving at a satisfactory settlement. The services to be rendered by the raiyat consist in tilling the lands of the landlord, building his house, and occasionally carrying his luggage. The customary service is three days' digging, three days' ploughing, three days' sowing, three days' cutting, with one or two days for threshing and storing grain. On the last occasion, when the agitation took a pronounced form, it was decided by the Government of Bengal, in consultation with the Commissioner, and with the concurrence of the Government of India, that the best way of preventing disturbances in future would be to give Government the power of intervening and of compelling both landlord

and tenant to accept commutation of the *rakumáts* and services into a money rental. Under the present law, commutation can be made if the parties come forward of their own accord and apply for it. The present Bill goes further than this, and allows Government to insist upon commutation whenever it thinks it expedient to do so. It is not intended that this power shall be exercised in every case of dispute, but only when the peace of the district is threatened.

"In addition to the disputes relating to conditions of service, there were other disturbing causes which had reference to the assessment of rent on excess lands, the enhancement of rent, the system of depositing rent in Court, and other vexed questions, and it was considered that the settlement of these matters would be facilitated by the extension of the Bengal Tenancy Act, with certain modifications, to Chota Nagpur, in place of the existing Act, I (B.C.) of 1879, which, in the opinion of many persons, has not been a success. In these respects the Bengal Tenancy Act was thought to be better adapted to the requirements of Chota Nagpur than the existing law, and it was especially deemed an advantage that the former Act would bring with it a collection of rulings and precepts which would be an invaluable guide to the Courts in deciding cases. It was proposed to omit sections 50 and 74, the former, because the country was not sufficiently advanced to give the raiyats the presumption which it creates in favour of a fixed rent, and the latter, which makes *abwabs* illegal, because it is opposed to the custom of the country, which allows certain cesses to be realised as rents.

"At the present time, however, as the Council is aware, there is a Bill under consideration for the amendment of the Bengal Tenancy Act in some important respects, and in view of this fact, the Select Committee are of opinion that this would be an inappropriate time to extend that Act to Chota Nagpur. I accept this as a reasonable suggestion, and do not therefore propose to press for the introduction of the Act into Chota Nagpur at present. Act I (B.C.) of 1879 will therefore remain, and section 2 of the Bill, which provided for its repeal, has been omitted from the amended Bill.

"Chapter II of the former Bill was a reproduction with a slight modification of sections 19 and 20 of the present Act, which it was necessary to retain, as they prescribe the incidents as regards liability to enhancement of certain tenures peculiar to Chota Nagpur. But as that Act is not to be repealed, there is no necessity for repeating the provisions in question in the present Bill. Chapter II has therefore been omitted.

"Chapter IV, relating to the registration and resumption of intermediate tenures, has also been omitted for the reasons mentioned in the Report of the Select Committee. When I last addressed this Council, I explained at some length the object of this Chapter: but as the subject is extremely technical and somewhat intricate, I do not propose to go over the whole ground again. It is sufficient to say that the object was, first, to secure the summary process of resumption which the zamindar possesses under Act I (B.C.) of 1879 of tenures held conditionally on the survival of male heirs of the original grantee; secondly, to enable him to accept the registration of a transferee without imperilling that right; and thirdly, to provide him with the means of realizing rents from such transferees. With the withdrawal of this Chapter the zamindar will be still left with the same means of resumption as he has under section 34 of the existing Act, but he will continue to labour under his present difficulty in the matter of the recovery of rent. The question of the best means of affording relief will still remain to be solved when the extension of the Bengal Tenancy Act is again considered.

"Regarding the main provisions of the Bill relating to the commutation and record of predial conditions and services I have but little to say, for section 4 is a reproduction with a slight modification of sections 25 and 26 of Act I (B.C.) of 1879, and relates to voluntary commutation at the instance of either the tenant or landlord. The alteration is in the proviso, which prescribes that, in the case of conditions or services other than *rakumáts*, the rent payable on commutation shall not exceed one-fourth of the rent already paid by the tenant. This is necessary in order to prevent the commutation pressing harshly on poor raiyats. Section 5 enables the Government to order the preparation of a record of predial conditions or

services, with or without commutation, whenever it may deem it expedient to make such an order. . As I have said before, this provision is intended to meet cases in which such an order is calculated to prevent a serious breach of the peace. Section 6 prescribes the particulars which the record is to contain, which, it will be observed, is a simple record of facts, and does not involve any enquiry into right, title, or status. Section 7 relates to the publication of the record and section 8 to appeals. The provisions regarding appeals follow as nearly as possible those laid down in Act I (B.C.) of 1879. Sections 11 and 12 provide for the defraying of the costs of commutation proceedings and follow section 114 of the Tenancy Act, with the difference that the revenue officer is authorised to require a deposit in advance from the person applying for commutation. The remaining sections of the Bill refer to the power vested in the Local Government for making rules and to the procedure to be observed for making and publishing the rules. The Bill as now prepared is of a simple and non-contentious character, and I trust it will be passed at the next meeting of this Council."

The Council adjourned to Saturday, the 28th instant.

RESOLUTION REVIEWING THE REPORT ON THE CALCUTTA MEDICAL INSTITUTIONS FOR THE YEAR 1896.

MUNICIPAL DEPARTMENT.—MEDICAL.

Dated Calcutta, the 24th August 1897.

RESOLUTION No. 4416Med.

READ—

The report on the Calcutta Medical Institutions for the year 1896.

Read also—

The report for the year 1895, and the Resolution recorded thereon.

The present report, which was due to Government on the 1st May, was not received in this office until the 21st July. The cause of this delay has not been stated.

2. The death-rate for Calcutta during the year 1896 was 35·7 per thousand and for Howrah 37·34, a rate in both instances lower than in 1895, when it was 39·6 and 42·84, respectively, but higher than that recorded during the preceding six years. Deaths from cholera in Calcutta increased from 2,099 to 3,449, a rise of 1,350; in Howrah, on the other hand, the mortality from this cause decreased by 177, a result which is attributed to the introduction of a filtered water-supply. It is satisfactory to observe that deaths from small-pox, which numbered 2,220 in Calcutta and 65 in Howrah in 1895, owing to the epidemic of that year, fell to 69 and 12, respectively. There was also in both towns a considerable diminution in the mortality from fevers and bowel-complaints.

3. The following table compares the number of patients, indoor and outdoor, treated at the Calcutta and Howrah hospitals during the past two years:—

4. The total number of outdoor patients, which is given as 258,794, shows a decrease of 7,878, which is accounted for by the year being less unhealthy than the previous one. At the Presidency General Hospital the numbers fell off by 163, at the Campbell Hospital by 4,537, at the Park Street Dispensary by 892, at the Dufferin Victoria Hospital by 941, and at the Howrah General Hospital by 768. A reduction of 5,745 at the Bhowanipur Dispensary is due to the fact that that institution was closed during the year in consequence of the opening of the new South Suburban Hospital. This decrease was, however, more than compensated for by the number of out-patients treated at the latter institution during the five months of the year it was open. The Mayo Hospital, on the other hand, shows a rise of 1,029; and there was a small increase in the attendance at the Medical College, the Eden, Ezra and Eyo Hospitals, and also at the Chandney Hospital.

5. There was a decrease of 1,232 in the total number of indoor patients treated, and the daily average fell from 1,303.63 to 1,238.51. The Campbell, Chandney and Howrah General Hospitals show a slight rise, but at all the other hospitals the numbers declined, the falling off of 780 at the Police Hospital being the most noticeable. A decrease of 224 in indoor patients at the Dufferin Victoria Hospital, as well as the decrease in outdoor patients above mentioned, is attributed to the removal of the hospital to a new locality and to changes in the staff. The popularity of the new South Suburban Hospital is shown by the fact that the daily average of indoor patients treated was 22.32.

6. Altogether 171,480 men, 46,712 women, and 66,249 children were treated as outdoor and indoor patients during the year, as compared with the 178,982 men, 45,764 women, and 68,805 children treated in 1895, showing a total decrease of 9,110. The number of Europeans diminished by 1,100, of Eurasians by 254, of Muhammadans by 6,061 and of Hindus by 2,729.

7. The death-rate for all the hospitals, excluding the Eyo hospital, was 14.2 per cent. of the number of patients treated, against 14.3 in the former year. Marked variations, depending on the class of patients admitted, occurred at the several institutions. Thus the death-rate for men was 1.31 at the Police Hospital, 5.39 at the Presidency General Hospital, 20.70 at the Campbell Hospital, and 23.95 at the Howrah General Hospital. At the last-named hospital, however, the rate both for men, women and children was lower than in 1895, while at the Campbell Hospital the death-rate among men, women and boys diminished, owing to fewer small-pox cases, while that among girls rose from 18.38 to 30.52, in consequence of deaths from cholera and diarrhoea.

8. The previous year's epidemic of small-pox showed no sign of reappearing in Calcutta, and only 57 cases, of which 16 ended fatally, were admitted to hospital, against 771 admitted in 1895. Among 16 of those attacked who were said to have been vaccinated, one, or 6.25 per cent., died; of four who had been inoculated, one, or 25 per cent., died; and of thirty-six who were unprotected, eleven, or 30.55 per cent., succumbed.

9. The number of cholera patients admitted rose from 600 to 1,007, and the number of deaths from 349 to 566; still the death-rate (56.20) was slightly lower than that of the preceding year (58.16). Among the patients there were 54 Europeans and Eurasians, of whom 30 died, a ratio of 55.55 per cent. The Lieutenant-Governor regrets to observe that 26 cases, of which 19 resulted in death, originated at the Campbell Hospital, as compared with 5 in 1895. The greatest care should be taken to ascertain, if possible, the origin of these cases, and to prevent the possibility of a recurrence of such an outbreak. One patient at the General Hospital was attacked with cholera, but it is reported that he had been infected before entering the hospital.

10. Dysentery cases decreased by 605, and the number of deaths among in-patients suffering from this disease by 166, the death-rate falling from 32.17 to 27.81. Diarrhoea patients also were fewer by 286 than in the previous year, but the death-rate rose from 32.37 to 39.87. While the death-rate among Europeans and Eurasians was only 10 per cent., the rate among other classes was 43.82, which is explained by the fact that a large number of moribund cases were admitted at the Campbell and Howrah General Hospitals. Malarial fever was less prevalent than in the preceding year, as was shown by the decrease in admissions from 59,256 to 48,982. The number of persons

treated for venereal diseases rose from 13,674 to 14,216, the more serious cases also showing an increase. Twenty-two cases of leprosy were treated during the year, 15 of which were dealt with in the Campbell Hospital. There were 23 cases of enteric fever and 1,075 cases of remittent fever, against 22 and 1,072, respectively, in 1895.

11. Surgical operations, in accordance with the orders of the Government of India, are no longer classed as "major" and "minor," but are returned according to the list of operations contained in the Appendix to the Nomenclature of Diseases, the number of individuals operated on being specified, and the operations being classified as "principal" and "secondary." In accordance with this system, 24,067 operations are shown as having been performed during the year. There were only five secondary operations; but, besides the number of operations stated above, there were 6,340 reported as having been performed, but not specified in the returns. The total number of deaths was 160, against 124 which resulted from major operations in 1895; the percentage being 73 on the total number of individuals on whom operations of all kinds were performed. The Mayo and Campbell Hospitals, where the figures were 3,158 and 2,115, respectively, show the largest number of operations.

12. In the Eden Hospital the number of women and children admitted as indoor patients increased from 1,453 to 1,579. Of these, 281 were Europeans, 460 Eurasians, 725 Hindus and Muhammadans, and 179 belonged to other classes. The death-rate for Europeans and Eurasians is given as 6.47, and that for all others as 10.50. The death-rate for native children fell from 34.71 to 25.36, although 13 children were admitted in a moribund condition. The number of confinements rose from 546 to 640, of which 49 resulted in death, as compared with 34 fatal cases in the previous year. There were 22 fatal cases of septicæmia, of which three originated within the hospital; but no record of the total number of these cases was kept, so that no comparison can be made with the figures for 1895. There were altogether 3,478 operations shown as performed within the hospitals, while in 1895 the number of major operations was 357 and the number of minor 4,803. It is satisfactory to note that in eight cases ovariectomy was performed without a death, against six cases and one death in the preceding year. The number of outdoor patients increased from 7,083 to 8,432. The suggestions for the improvement of this hospital are still under the consideration of Government.

13. The Shama Churn Law Eye Hospital shows an increase of 25 in the number of indoor, and a decrease of 519 in the number of outdoor patients treated during the year, but the latter figure is probably incorrect, as it is stated that the attendance on Sundays was not entered in the registers. The daily average attendance rose from 148.57 to 161.34 and the number of operations from 470 to 597. Of the latter, 347 were in cataract cases, and 80.40 per cent. were successful, against 76.82 per cent. in 1895.

14. At the Ezra Hospital indoor patients increased from 199 to 205, and outdoor patients decreased from 1,624 to 1,611. Only 11 operations were performed, against 108 in the previous year, the falling off being explained by a large decrease in the number of minor operations. The cost of the hospital was Rs. 6,646, of which Rs. 5,770 were contributed by Government.

15. The Lieutenant-Governor is pleased to receive a favourable report on the nursing staff at the Campbell and Howrah Hospitals. The question of the nursing arrangements at the Presidency General and at the Eden Hospital is under consideration, but at the former institution the work is said to be improving. Thirteen pupil nurses and five *dais* passed their examinations during the year from the Eden Hospital.

16. The invested capital of all the hospitals decreased from Rs. 5,99,400 to Rs. 5,96,100, only Rs. 2,500 being invested during the year by the Medical College and the Howrah General Hospital, and the invested capital of the Bhowanipur Dispensary, Rs. 5,800, being shown as withdrawn. The following

statement shows the main heads of receipts and expenditure of the Calcutta and Howrah hospitals during 1895-96:—

17. Excluding the opening balance, the total income amounted to Rs. 6,57,863, against Rs. 5,42,777 in the preceding year. The cost to Government increased by Rs. 1,13,715, the greater part of which is accounted for by the sums spent on building, viz., Rs. 68,013 at the South Suburban and Rs. 15,621 at the Howrah General Hospital, and the remainder by the amounts spent on nursing at the Medical College and the Presidency General Hospital, viz., Rs. 15,621 and Rs. 18,081, respectively, which were for the first time included in the general statement of accounts. The inclusion, on the other hand, of the amounts paid by the Ladies' Committee of the Hospital Nurses' Institution on the nursing establishment of the Medical College and the Presidency General Hospitals accounts for the increase shown in the receipts from local funds. Receipts from paying patients fell off by Rs. 4,361, the decrease being most marked at the Campbell Hospital. There was a slight falling off in the receipts from municipal funds and in subscriptions from Europeans, while subscriptions from natives decreased by nearly half. The total expenditure rose from Rs. 5,38,770 to Rs. 6,54,444, the increase being chiefly observable under the heads "Buildings and repairs," the sum spent on which rose from Rs. 70,530 to Rs. 1,28,562, and "Miscellaneous charges," which absorbed Rs. 1,01,209, as compared with Rs. 87,752 in the preceding year.

18. The suggestion made in last year's resolution that certain items of expenditure in several of the hospitals were capable of reduction appears to have received attention. A reduction was effected in the sums spent on European medicines at the Mayo Hospital, and the returns show that the amount expended on the salaries of compounders and dressers was considerably less than in the preceding year.

19. The South Suburban Hospital was opened to the public on 1st August, the entire cost of its construction having been met by Government. The Municipal Commissioners contribute Rs. 5,203 a year, including the annual subsidy from the trust funds in their possession, towards the maintenance of the hospital, and appoint two out of the six governors by whom the institution is managed, Government appointing the remaining four. The hospital is reported to be working satisfactorily. It has since its opening been daily crowded both with indoor and outdoor patients, and there is no doubt that its erection has met a want long felt in that part of the town.

20. During July and August a specially appointed Committee enquired into the structural defects of the Presidency General Hospital, and submitted a carefully considered scheme for its reconstruction, which was accepted by Government. The land required for the purpose has already been acquired, but the demands of the present year on the finances of the province, which were not then foreseen, have delayed the execution of the scheme. Every effort will, however, be made to carry out the Committee's recommendations, as soon as funds permit. Meanwhile, a second Committee has lately been appointed to report how the existing defects of the hospital can best be remedied, to examine the nursing arrangements, the supply of bedding, linen and clothing, the general system of supervision and the adequacy of the staff of servants, and to suggest rules for management. The report of this Committee has not yet been received. An estimate of Rs. 87,317 has been passed for the improvement and enlargement of the out-door dispensary at the Medical College Hospital, while a sum of Rs. 57,000 has been allotted for the purchase of beds and instruments for the hospital. For the improvement of the Campbell Hospital, Rs. 63,564 have been granted for the extension of the outdoor department, which in future will have separate accommodation for each sex.

21. The office of Inspector-General of Civil Hospitals was held for the greater part of the year by Surgeon-Colonel G. C. Ross, who was unfortunately compelled by ill-health to take furlough in March last, previous to retirement. He was succeeded by Surgeon-Colonel J. H. Newman, by whom the present report has been submitted. The Lieutenant-Governor takes this opportunity of expressing his sense of obligation to Dr. Ross for the energetic measures he took to initiate much-needed reforms in the medical institutions in Calcutta. His Honour's thanks are also due to Dr. Newman for his clear and concise report.

By order of the Lieutenant-Governor of Bengal,

C. E. A. W. OLDHAM.

Offg. Secretary to the Govt. of Bengal.

**RESOLUTION ON THE ADMINISTRATION REPORTS OF THE ALIPORE
AND HAZARIBAGH REFORMATORY SCHOOLS FOR THE YEAR 1896.**

No. 2715P.

RESOLUTION.

JAILS.

Dated 24th August 1897.

READ—

Letter No. 5691, dated the 10th June 1897, from the Inspector-General of Jails, submitting the Annual Reports on the Alipore and Hazaribagh Reformatory Schools for the year 1896.

Read also—

The Reports for the years 1895 and 1894, and the orders of Government recorded thereon.

These Reports have been submitted by the Inspector-General of Jails with remarks summarising the results of the year's working in both the institutions. The want of uniformity in the treatment of the subjects in the two Reports noticed in the last year's Resolution has been remedied. The Reports might, however, be somewhat condensed with advantage by the omission of petty details of no interest. Since the close of the year, the law relating to Reformatory Schools has been amended, and further provision for dealing with youthful offenders has been made by Act VIII of 1897.

2. The total number of boys in the two schools on the 31st December 1895 was 548, of whom 213 were in the Alipore and 335 in the Hazaribagh school. The number admitted into the two schools, respectively, during the year 1896 was 70 and 77, making a grand total of 695. Of these, 156 boys were released, eight died, two at Alipore and six at Hazaribagh, and two escaped from the Hazaribagh school. At the end of 1896, 529 boys remained in confinement, of whom 201 were at Alipore and 328 at Hazaribagh. Of the total number, 358 were Hindus, 160 Muhammadans, 9 aboriginals, and 2 Native Christians. The daily average number of boys was 215·79 at the Alipore and 331·27 at the Hazaribagh school, compared with 218·27 and 344·29 respectively in 1895, and 223·60 and 313·13 respectively in 1894. The general health of the two institutions, especially of the school at Hazaribagh, was not so good as in the two previous years, the daily average of sick being 5·35 at Alipore and 2·12 at Hazaribagh, against 3·16 and ·85 respectively in 1895, and 3·83 and 1·55 respectively in 1894. The Superintendent of the Hazaribagh School reports that a particularly fatal epidemic of influenza affected the immediate neighbourhood from February, and he attributes to it a general deterioration of the health of the boys, resulting in four deaths. The usually excellent health of the institution did not return until July. Another death in the school was caused by chronic dysentery brought on by the boy's constantly taking the juice of an euphorbia growing in the garden, with a view to escape work. Of the two deaths in the Alipore school one was due to a fatal assault committed by a grown-up boy of the school, who was subsequently tried judicially and sentenced to seven years' rigorous imprisonment in jail.

3. *Offences, punishments, and marks.*—The number of offences committed and punishments awarded in the Alipore school rose from 83 to 162, but in the Hazaribagh school fell from 322 to 271. The increase in the Alipore school is said to have been due to stricter supervision rather than to any actual increase of misconduct. There being no solitary cells in either of the institutions, separate confinement is resorted to when the segregation of a boy is considered desirable. The heading "Solitary confinement" in Statement III attached to the annual

Reports should, therefore, be changed to "Separate confinement." There were 19 cases of separate confinement in the Alipore school against 16 in 1895. No such case occurred in the Hazaribagh Reformatory in 1895, and there was only one case in that institution during the past year. The average number of boys entitled to marks was 179 at Alipore and 319 at Hazaribagh, against 159 and 324 respectively in 1895. The weekly average money earnings amounted to Rs. 11-9-10 at Alipore and Rs. 14-9-9 at Hazaribagh, against Rs. 5-15-1 and Rs. 13-11 respectively in 1895. The total earnings were Rs. 604-6-9 at Alipore and Rs. 759-12-6 at Hazaribagh, against Rs. 405-2 and Rs. 679-2 respectively in 1895.

4. *Instruction and gymnastics.*—As in previous years, blacksmith's and tin-smith's work and carpentry were taught in both the institutions. Besides these, book-binding, printing, and cane-work were taught at Alipore, and carpet and blanket-weaving, shoe-making, cloth-weaving and tailoring at Hazaribagh. The suggestion made by the Superintendent of the Hazaribagh school to discontinue instruction in some of the trades now taught in that institution, in view of the discouraging results shown by the return of boys following those professions after release, should be considered by the Inspector-General of Jails, from whom a report will be awaited. The boys in both the institutions were instructed in Hindustani, Bengali and arithmetic, and the more advanced boys were also taught English. The number of teachers has been found insufficient in both the schools. The Board of Management have recommended the reorganization of the educational staff at Alipore, and the omission of English as one of the subjects taught. The matter is before the Government. The revision of the school staff at Hazaribagh is also being considered by the Inspector-General of Jails in communication with the Director of Public Instruction, and a report will be made to the Government. The teachers in both the institutions are reported to have performed their duties in a satisfactory manner. Drill and gymnastics were carried on with regularity throughout the year, and the exercises are reported to have had a beneficial effect on the health of the boys.

5. *Character reports of released boys.*—The Report of the Alipore school furnishes information regarding the conduct of boys released during 1895, while the information in the Hazaribagh school report relates to boys released in 1896 as well as in 1895. There should be uniformity in the reports, and, as suggested by the Inspector-General of Jails, the heading of Statement IV, which requires two years' statistics to be given, should be amended, and figures for the year preceding that under report should alone be furnished, as was ordered in the Resolution on the Reports for the year 1894. Of the 62 boys released from the Alipore school during 1895, 27 are reported to be well conducted, 22 cannot be traced, 4 are in jail, 1 is viewed with suspicion, 6 are following the trades taught in the school, and 2 have died. The figures of the Hazaribagh school are:—

6. *Manufactures.*—The total profits from manufactures fell from Rs. 16,679 to Rs. 16,074, of which sum Rs. 11,190 were made in the Alipore school and Rs. 4,884 at Hazaribagh, against Rs. 12,763 and Rs. 3,930 respectively in 1895. At Alipore a great portion of the profits was derived from book-binding, and at Hazaribagh from cloth-weaving and tailoring. The average earning per head at Alipore was Rs. 60-8-5 and at Hazaribagh Rs. 19-5-7, against Rs. 64-2-2 and Rs. 17-7-6 respectively in the previous year.

7. *Expenditure.*—The following table compares the expenditure under the several heads in the two schools during the past two years :—

* Including travelling allowance.

The instructions issued in the last year's Resolution to show the charge for construction and repairs below the total of the above return have not been followed in the preparation of the Report of the Alipore school. As remarked in the Resolution, this item is casual and does not properly enter into the calculation of the cost of the school per head of population, and should, therefore, be shown separately. There has been an increase in the cost per head in both the institutions, chiefly due to the purchase of new clothing for boys and to the rise in the price of food-grains.

8. *General.*—Two boys were received from Assam in the Hazaribagh school. One managed to make his escape while working outside the school premises, and has not yet been recaptured. It is probable that no increase of accommodation will be needed at Hazaribagh to provide for boys sent from Assam. Wrought-iron pipes were laid in the Hazaribagh school during the year for conveying drinking and cooking water to the cook-house and feeding-platform, and at the Alipore school a new latrine was constructed, and a second story on the southern workshop, which is required to enlarge the accommodation, has been nearly completed. A note on the nutritive value of the food supplied to the boys of the Hazaribagh School prepared by Surgeon-Captain Nott, Superintendent of that institution, and appended to the Report, shows that the boys are given sufficiently nourishing food. The number of visits paid by the official and non-official visitors to the two institutions during the year was satisfactory.

9. The Lieutenant-Governor desires to thank the Board of Management and the Committee of Visitors for their continued interest in the working of the two institutions. Mr. Hill's management of the school at Hazaribagh has been most efficient, and the assistance gratuitously given by Mrs. Hill, especially in personally supervising the diet and nursing of the boys when sick, is highly spoken of by the Superintendent and the Inspector-General. The Lieutenant-Governor observes that the Inspector-General is strongly of opinion that every Reformatory School should endeavour to secure the services of a matron who should form part of the regular establishment. Dr. Comins should submit a separate report on the subject for the consideration of Government.

ORDER.—Ordered that a copy of the Reports and a copy of the Resolution be forwarded to the President of the Board of Management of the Reformatory School at Alipore, for information and for communication to the members of the Board.

Ordered also that a copy of the Reports and a copy of the Resolution be forwarded to the Inspector-General of Jails for information and for communication to the Superintendent of the Hazaribagh Reformatory School.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

Imports.—During the period under report, the imports of rice amounted to 339,780 cwts., against 16,277 cwts. in the second week of August 1896. The amount imported from Burma was 294,089 cwts., that from Madras 6,753 cwts., and that from the Straits Settlements 4,882 cwts., all against nil in the corresponding period of last year; shipments of rice from Chondali rose from 12,943 cwts. to 30,699 cwts. The imports of paddy from Chondali fell off by 12,133 cwts., but this decrease was for the most part counterbalanced by larger imports from Madras, Rangoon and Balasore. The fluctuations under the head of gram and pulses were unimportant.

Exports.—In the following statement the total quantity of each kind of food-grain exported by sea during the week ending 14th August 1897 is compared with that, for the corresponding period of 1896:—

The exports of rice from Calcutta to foreign ports declined from 37,421 cwts. in the second week of August 1896 to 26,161 cwts. in the period under report. The decrease in exports to Ceylon was 12,181 cwts., and in exports to the Mauritius 9,517 cwts., while to Réunion 17,179 cwts. were shipped, against nil in the corresponding period of last year. The decrease under gram and pulses was chiefly due to smaller exports to the United Kingdom and Mauritius.

As regards Indian ports, the exports of rice during the second week of August 1896 amounted to 722 cwts., against 683 cwts. in the period under report. Under gram and pulses there was a decrease in exports to the Madras ports of 5,843 cwts.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.
The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Bookley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; t, thunder; < lightning.
